Mines and Mining Stocks

CACTUS OUTPUT SHOWS UP BIG

March's Product Has Estimated Value of Close to \$300,000.

TONNAGE FIGURES GIVEN

SHIPPING ORE MORE THAN PAYS OPERATING COSTS.

During the month of March between 23,-000 and 24,000 tons of ore were treated at the milling plant of the Newhouse Mines & Smelters company, while 550 tons of first class ore was sent direct to the smelters. The milling ore was converted into 2,890 tons of concentrates and, while Manager Lafayette Hanchett did not feel at liberty to go into details concerning the value of the product, stating that such data could only be released at the New York offices, he did say that the crude ore sold had more than met operating expenses, leaving the 2,890 tons of concentrates to represent net earnings. President Samuel Newhouse will be in New York on his way back from Paris and London, Wednesday, and he will likely give details on the month's operations then. Figuring roughly from a general knowledge of what is doing at the property, it is safe to say that the amount of copper made is close to a million pounds and, including gold and silver contents, is worth approximately \$300,000, smelters. The milling ore was converted

of copper made is close to a million pounds and, including gold and silver contents, is worth approximately \$300,000, nearly \$250,000 of which should be net.

This is the biggest month's production in the history of the Cactus mine, and Manager Hanchett states that, if no difficulties are experienced in getting fuel, April's output will be better yet. The mine, which he visited Saturday, is, he states, looking better and better as development proceeds. Sinking is now well under way from the 606-foot level, and other level will be established while the shaft goes on down to the 800.

There has been some talk during the past few days to the effect that the mine sequipment will not permit of the mining of a greater tonnage that is now being extracted. This, Superintendent J. D. Moffat who was in the city yesterday, states is ridiculous.

"When everything is ready for it," said he, "I can send out of the mine, without adding anything to our hauling facilities, unless, possibly, a few more cars, 2,500 tons every twenty-four hours just as easily as I now send out less than 1,000 tons. We have two twenty-five tons in about four minutes, and unload it in three or four minutes, or elected with the death at the mine in better shape to i

LIVELY NIPISSING ANNUAL. Small Stockholders in Evidence-Capital to Be Decreased.

Augusta. Me. April 1.—The first annual meeting of the stockholders of the Nipissing Mines company was held here today. The chief business transacted was the re-election of the old board of directthe re-election of the old board of directors and the enlargement of the directorate from nine to eleven. The new members of the board of directors are Samuel Newhouse of Salt Lake and Lyman B. Kendall of New York. An expected contest over the proposition to increase the directorate did not develop.

The stockholders attending represented \$37.221 shares, of which 718.223 shares, controlled by Charles H. Boynton and W. C. Orr, both of New York, supported the proposition to increase the number of directors and the supported the proposition to increase the number of directors.

tors, Charles Hope Caldwell of New York, representing O. F. Jonasson of New York, who controls 63,500 shares, said to represent the holdings of about 1,000 persons, made an unsuccessful attempt to et several votes put through. Jonasson and George F. Morton of To-

ronto conducted a campaign previous to today's meeting to secure proxies to be used in voting for certain reforms which they declared were needed in the man-agement of the company. They claimed that Secretary W. T. Greene of New York refused to allow them to see the minutes of the meetings of the board of directors and of the executive committhee. Mr. Caldwell asked that the stock-holders present vote to give him permis-sion to see those minutes. He said the small stockholders ought to know how the business had been conducted. The motion was defeated.

The by-laws were amended so as to provide for "not less than three nor more provide for "not less than three nor more than fifteen directors." and it was voted that for the ensuing year the number be fixed at eleven. Previous to this vote a motion that the number for the coming year be fixed at fifteen was lost.

The nieeting then adjourned until April 22, when the stockholders will vote on the proposition to retire \$6,000,000 of capital stock which has never been issued.

ing on ultra-conservative lines, there is less of a disposition to margin and play Indian than formerly. The new deal should have a good effect on the market price of stocks, as trading will be done n more legitimate and much nearer a

During the two regular and open board calls a total of 26,320 shares of stock, with a selling value of \$19,558,50, changed hands. Following is the list of final quotations and record of sales made during the day: Forenoon. | Afternoon.

OPERATIONS AT MINES OF WESTERN NEVADA CO. STRIKE IS MADE IN

Manager M. M. Johnson returned from his trip to the Dyer properties of the Western Nevada Copper company at Yer-ington Sunday night and pulled out for the Dominion company's mirror of the ington Sunday night and pulled out for the Dominion company's mines at Boundary Falls. British Columbia, last night. He stated yesterday that, while the ledge had not been tapped in the lower tunnel of the Dyer mines at Yerington, the face was so full of sulphides that he did not expect other than that a big body of fine ore would be shortly disclosed. Buildings are all up at the mine and he is now only awaiting the signal from the new electric power company to forward machinery to the mine. Mr. Johnson was highly pleased at the appearance of things at the mine and stated that he was confident that the next few months would make big history at the property. the property.

Mr. Johnson is hurrying to the Domin-

Mr. Johnson is hurrying to the Dominion properties at this time for two reasons. He has decided, for one thing, to take T. R. Drummond from the Dominion properties and place him in charge a tthe Nipissing company's silver mines at Cobalt, and hustle another man for the Dominion job. He is also anxious to be on the ground and witness the installation of the third furnace at the Dominion smelter, which is expected to go minion smelter, which is expected to go into commission this month. He will be

SALT LAKE TALENT AFTER NEVADA PROPERTY

MINING STOCK EXCHANGE.

New Banking Rule Trims Wings of Professional Traders.

The local mining stock market is now down to "hard tacks." Yesterday the new banking rule, which shuts down on overdrafts and requires the giving of notes with approved security for monies advanced, is believed to have had much to do with the small amount of trading done on 'change yesterday. The market has been largely professional for two or three weeks, and, with the banks work—

J. X. Gardner, a Nevada mining engineer, is in the city interesting local talent in a proposition which he and others control, and which is located southeast of Virginia City and about eight miles east of Dayton, Nev. A company will likely be organized during the week to operate the ground.

Mr. Gardner, a Nevada mining engineer, is in the city interesting local talent in a proposition which he and others control, and which is located southeast of Dayton, Nev. A company will likely be organized during the week to operate the ground.

Mr. Gardner states that the ground was located last July, but up to the present time nothing but surface work has been done on the ledge, which he states crops for 1,000 feet in the claims. A careful suppose the proposition which he and others of Dayton, Nev. A company will likely be organized during the week to operate the ground.

IN FINE SHAPE

Begins New Year With a Treasury Reserve of Healthy Dimensions.

NEW CROWD IS IN CONTROL

MINE IS NOW IN SHAPE TO MAKE MONEY.

A fine showing was made at the annual meeting of the May Day Mining company Dom. Copyesterday and, while the control was G. G. & S. Nev. Utah meeting of the May Day Mining company yesterday and, while the control was G. G. & S. Nev. Utah nassed into entirely new hands, the retiring officials have every reason to feel Mitchell .. proud of the record made during the Giroux year. For many months stock in the company has been finding its way into the hands of and interests identified with the directorate and the result of the election might have been foretold weeks ago The board, as elected at the meeting and organized later in the day, is as follows: John Dern, president and manager; B. F. Caffey, vice-president; W. C. McCornick, treasurer; D. L. Fulop and M. P. Braffett. Gus Reeves was named as sec-retary and the offices of the company will now be moved to the Dooly building. will now be moved to the Dooly building.

The financial statement rendered by Secretary John Campbell showed that the year opened with cash in bank amounting to \$2,669.58. Receipts from sales of ore, etc., were \$76,352.49, making a total of \$79,022.97. Disbursements totaled up to \$69,644, leaving a balance on hand of \$3,378.67. In addition to this, it was shown that eight earlies of ore shipped and the private wires of James A. Pollock & Co., were as follows:

Nevada Con 144.2 15

Stocks in San Francisco.

The closing quotations on Nevada stocks in San Francisco yesterday, as reported over the private wires of James A. Pollock & Co., were as follows:

Tweleye cars of ore from Utah and five \$9.378.07. In addition to this, it was shown that eight carloads of ore shipped and still unsettled for were worth approximately \$8,400, while the unpaid operating expenses of March would amount to about \$4,000 so that, as a matter of fact, the new crowd takes hold of the proposition with approximately \$13,778 to the good after all bills are paid.

One year ago everybody was certain that the mine could not run sixty days without an assessment and, while a vast amount of development work was being done and matters looked squeamish for a time, Manager J. E. Darmer, ably astacked.

a time, Manager J. E. Darmer, ably assisted by Superintendent H. M. Eakin, pulled the proposition through and placed the mine where it is today, in admittedly better shape than it has been for many

Manager Darmer's report shows that some extensive bodies of fine ore have been opened up, ore that has been and is now netting the company more than \$1.000 a carload, while other known bodies are on the eve of being tapped in some of the workings.

ome of the workings.

Attention is also directed to the large bodies of milling ore that are exposed in the mine; to the lease that has been given the Cactus Ore company for the treatment of the second-class dump and such mill ores as are mined during the life of the lease. It explains that the company mentioned has remodeled the old May Day mill and introduced a dry process of concentration that appears to be making a fine saving and which should result in the lode grade ores of the mine affording a fine source of revenue to the May Day company in the future.

Manager Darmer pays a high compliment to Superintendent H. M. Eakin, thanks his board of directors for the loyal support given him and bespeaks their hearty support of the new administration. their hearty support of the new adminis-

"In conclusion," says Manager Darmmore or less familiar with the mine condition for the past fifteen years believe that it is in better condition has more numerous and larger ore bod-ies in sight, with a greater tonnage of shipping ore exposed, and with better prospects for their continuance than at any, time in the history of the property."

THE DALY-WEST MINE

A strike of high grade ore has just been made on the 1,500-foot level of the Daly-West, but there is nothing to guide the management in reaching a conclusion as to what it is likely to amount to. Development alone must solve the problem, as the find has been made in absolutely virgin territory. Considerable drifting has been done on this level in an easterly direction toward the Daly from the winze through which the mammoth shoot if milling ore to the west moth shoot if milling ore to the west was opened, but without result worthy of mention. As no lime was in evidence in the drift it was recently decided to cross-cut to the north and determine whether the ground had not faulted. No great distance had been run until some lime and some little ore was struck. lime and some little ore was struck. It did not dip right, however, and the crosscut was continued.

A message from the mine foreman to Manager Ernest Bamberger yesterday aft-ernoon advised the latter that two and one-half feet of high grade shipping or had been cut in the face of the cross cut drift and that it looked good. It this portion of the ground opens up as

WORK IS HUMMING AT BOSTON CON. MILL

Engineer A. J. Bettles reports splendid headway now being made in the con-struction of the Boston Consolidated company's great milling plant at Gar-field. The crude ore receiving bin build-ings and all the trestles for the railroad ings and all the trestles for the railroad track leading to them are now completed. So is the main crushing department of the mill proper. This portion of the mammoth structure contains more steel and is more imposing in appearance than any other portion of the works, as it is the highest. The steel frame work in the west end of the main concentrating building covering the first two sections is also in place, and Mr. Bettles states that steel is rolling in at a pace that is gratifying to see, while a large force of mechanics are knitting it together. At the rate things are now moving the Boston Consolidated company will be ready to begin the treatment of 3,000 tons ready to begin the treatment of 3,000 tons of ore a day before the dog days of

COPPER STOCKS IN **BOSTON AND NEW YORK**

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, a feature that has just been added by James A. Pollock & Co. to its private wire service, and from which it is secured for use in this department of The Herald.

Boston, April 1.-Saturday's favorable ank statement and more favorable news rom Washington, caused an early cheerful sentiment in the New York and Bos-ton markets and prices were higher all along the line. Shortly after the opening however, considerable liquidation took place and the market reacted until within the last hour, when it was announced that the president would issue a letter to the Illinois Manufacturers' association on his attlitude toward the railroads which would be considered very favorable and prices climbed rapidly toward the close, which was at about the best of the day. We look for a gradual improvement on the theory that liquidation has been practically through and stocks have landed in stronger hands than before the recent panic and easier rates for money in the next ten days.

DOINGS OF UNLISTED STOCKS ON EXCHANGE

There was little doing in unlisted stocks yesterday. Those which did record sales were stronger, if anything, than on Saturday. Bingham Standard, which closed last week at 65c, sold first at 68c, and then at 71c. Mason Valley sold at \$2 and \$1.95, Emma Copper brought 40c and 42c, and a little Newhouse changed hands at \$21.

Western Nevada Copper was quoted at \$1 and \$1.15, Ohio-Kentucky at \$2.50 and \$2.80; Bingham Central at \$1.50 and \$1.62, Congor at 45c and 60c, and Copper Glance

Congor at 45c and 60c, and Copper Glance at 23c and 27c. For Ohio Copper \$4.25 was bid, and for Ely Witch \$1. Cedar was offered at 50c, Yerington Copper at 65c, while Keystone was at 10c bid. Demijohn 10c and Uintah Treasure Hill 22c.

MASON VALLEY TAPS TWENTY PER CENT ORE

A report from the Mason Valley company's property, received at the local offices yesterday, states that the face of the north drift is now running into a heavy black sulphide ore that averages 20 per cent copper. At this point the ore appears to be making out of the lime into the porphyry, a fact that is taken to indicate unusual strength. ++++++++++++++++++++

Ore and Bullion.

Ore and bullion settlements in this city vesterday, as reported by McCornick & Co., amounted to \$59,000, as follows: Silver, lead, gold and copper ores, \$19,000; base bullion, \$40,000.

Metal Markets.

Silver, 65%c per ounce, Copper, (casting), 24%c per pound. Copper, (cathodes), 24%c per pound. Lead, \$6 per 100 pounds.

Elgin Butter. Elgin, III., April 1.—Butter firm at 30 cents; sales for the week, 547,600 pounds.

Mining Notes.

R. W. Evans returned Sunday evening from an extended business trip to Chi-cago and New York. Broker C. E. Hudson is over from San

Francisco for a day or two looking after interests on this end of the line. Tweleve cars of ore from Utah and five from Nevada were released from the Taylor and Brunton sampler yesterday

Will J. Lawrence, the Rosebud operator. came in from that thriving Nevada camp vesterday morning to look after business matters here.

matters here.

C. D. Rooklidge, who has been in New York on mining business since the middle of last month, returned home Sunday night. He believes that there is going to be the biggest boom in mining the country ever knew and that it will be on before the western people know it. The recent shaking up in the railroads and certain other industrials, he believes, is going to turn the tide in favor of mingoing to turn the tide in favor of minig investments.

The presumption is that the Annie Laurie company's property at Gold Mountain, was sold yesterday to satisfy the company's obligations. The sale itself does not amount to very much. There is a six months' redemption period and, unless the matter is adjusted to the satisfation of all concerned, it is not likely that the magnificent property will be allowed to go for the amount involved, which is understood to be less than \$75,100.

The Salt Lake Route is operating train daily, leaving at 9 p m., for Milford, Lund, Modena, Newhouse, Utah, and Acoma, Nev. Stage connections for all southern Utah points.

SEVEN TROUGHS WONDER MIN-ING COMPANY.

Considerable interest is being manifested in a new property located in the Seven Troughs mining district, known as the Seven Troughs Wonder Mining company. This company owns and is operating a group of claims in the heart of the Seven Troughs district, and has for its neighbors such famous mines as the Kindergarten, the Badger and the Hills.

The Wonder has a remarkable showing, considering its infancy. A shaft has been sunk eighty-five feet, and assay returns show from \$40.00 to \$637.20 in gold, and indications are that it will be one of the largest producers of the

R. K. Cobb & Co. of this city have a small allotment of treasury stock of this corporation for sale at twenty-five cents per share, which is the first and only allotment that will be put out in Utah at this price. The amount allotted to Nevada and put out by Gray McAlister-Craig Company, fiscal agents, of Goldfield, was many times over-subscribed.

Bitten by a Spider.

Through blood poisoning caused by a spider bite, John Washington of Bosqueville, Tex., would have lost his leg, which became a mass of running sores, had he not been persuaded to try Bucklen's Arnica Salve. He writes: "The first application relieved, and four boxes healed all the sores. Heals every sore. 25c. At Z. C. M. I. Drug Deparment.

30,000 ACRES OF LAND To Be Thrown Open for Settle ent.
